## 1. szöveg

**European court: Google must amend some results**

The European court, in an important test of the "right to be forgotten," ruled that Google must amend some of its search results when they show links to out-dated, irrelevant information.

In an advisory judgment the Court of Justice of the European Union said Google and other search engines do have control of individuals' private information.

The court found that under European law, individuals have a right to control over their private data, especially if they are not public figures. If they want irrelevant or wrong personal information about themselves "forgotten" from search engine results, they have the right to request it — even if the information was legally published.

People "may address such a request directly to the operator of the search engine," the ruling said.

Whether or not the request should be granted will depend "on the nature of the information in question and its sensitivity for the data subject's private life and on the interest of the public in having that information, an interest which may vary," the court said.

Google had argued that it doesn't control personal data, it just offers links to information already freely and legally available on the Internet. It had also argued that it should not be forced to play the role of censor, especially when it offers links to information that was legally published.

*Elérhető pontszám: 4 pont*

1. 

A/ According to the rule of the European court ordinary people may forget irrelevant information.  
B/ If Google shows links to out-dated information, ordinary people may request the amendment of search results.  
C/ According to the decision of the European court the right to request information must be forgotten.  
D/ The European court tested the right to be forgotten.
2. 

A/ The court found the solution for people if their information had been published.  
B/ People who are not public figures are entitled to ask for the removal of their data from search engine results.  
C/ Under European law legally published information may be removed from search engine results.  
D/ People who are not public figures may forget data stored in the Internet.
- 3/ 

A/ If people do not agree with the search engine, they may ask for its merits.  
B/ People who are not satisfied may request the operator to examine the search engine.  
C/ The operator of the search engine may be asked to examine their merits.  
D/ The operator of the search engine can be directly contacted.
- 4/ 

A/ Google's argument was that it cannot be blamed.  
B/ Google claimed that its activity does not include data control.  
C/ Google was not concerned with legal publications.  
D/ Legally published information has nothing to do with Google.

*Elérhető pontszám: 6 pont*

According to the \_\_\_\_\_ (1) of the European court, there are several factors the operator should take into account as to whether the request could be \_\_\_\_\_.(2) One of these factors is the \_\_\_\_\_ (3) of the given information or even public \_\_\_\_\_ (4) which can be influenced by the circumstances. Google argued that it just lets people reach information \_\_\_\_\_ (5) on the Internet and it does not want to be \_\_\_\_\_ (6) to check legally published information.

## 2. szöveg

**True cost of drugs**

1. More than 50 per cent on inmates in U.S. federal prisons were jailed for drug offences, shocking new figures show. The statistics reveal that out of a total inmate population of 215,888, 102,391 (that is 50.8 per cent) were sentenced to jail for drug offences. The second highest crime area was weapons, explosives and arson offences. Murder, aggravated assault and kidnapping offenses made up 2.7 per cent with 5,473 inmates.

2. The drug offences relate to crime in multiple ways. Most directly, it is use, possession, manufacturing and distributing drugs, but the offences also involve crimes such as drug trafficking and drug production controlled by drug cartels, organized crime and gangs.

3. Use-related crimes are those that result from or involve people who ingest drugs and who commit crimes as a result of the effect the drug has on their behaviour. The second main area is economic-related crimes where individuals commit a crime to fund a drug habit, namely they supply narcotics. These include theft and prostitution. The third are system-related crimes resulting from the structure of the drug system.

4. As crime continues to fall in many communities, law enforcement will have more time to focus on aggressive policing of drug offences; this can be expected to lead to even more serious sentences and crowded jails and prisons.

Drug offences and crimes have \_\_\_\_\_ (1) bearing. These type of offences cover a large area from the crime of owing something illegally, i.e. \_\_\_\_\_ (2), to selling and buying drugs, i.e. \_\_\_\_\_ (3). Sometimes drug takers even commit crimes due to the \_\_\_\_\_ (4) of narcotic or steal something, namely commit \_\_\_\_\_ (5) to supply their needs. In the future law enforcement authorities will concentrate on \_\_\_\_\_ (6) drug related offences.
