

PROFEX SZAKNYELVI VIZSGA

B1(alapfok) – angol nyelv
Írásban teljesítendő
Beszédértés

vizsgázó sorszáma:

MINTATESZT

Oldja meg a két feladatlapot a hallott szöveg alapján! Elérhető pontszám: 20 pont

Figyelem! A vizsga akkor lehet sikeres, ha a vizsgázó részegységenként legalább 40%-ot teljesít.

Végső megoldásként csak a tintával írt változatot fogadjuk el.

Kérjük, hogy jól gondolja meg a választát, mivel bármilyen válaszmódosítás esetén válasza érvénytelen.

MEGOLDÓKULCS

1. szöveg

Designer drugs

The term 'designer drugs' refers to drugs that are created in a laboratory (typically, a secret, illegal lab). A designer drug is created by changing the properties of a drug that comes from a plant - such as cocaine, morphine or marihuana - using the tools of chemistry. The resulting 'designer' drugs typically have a new, different effect on the brain or behaviour. Their ingredients and potency (how strong they are) vary a lot, making it nearly impossible to know what is actually in them or what they can do to you. They are extremely dangerous for users who don't know what they are getting - or getting into. New designer drugs have effects on the serotonin receptors in the brain, but also in the blood vessels and everywhere. So if you take a truly large dose, which is easy to do, you can have drastic, unexpected effects on vital functions, your blood vessels contract, your heart rate goes way up, your temperature regulation goes out of control. It is not surprising that these unknown mixtures can cause serious side effects, such as seizures, memory loss, coma and even death.

FELADATLAP

1. szöveg

1. Egészítse ki az alábbi mondatokat **egyetlen.** a szövegben elhangzott angol szóval.

(4 pont)

1.1. Designer drugs are usually created in a secret **illegal** laboratory.

1.2. Designer drugs are created by changing the chemical structure of a drug originating from a **plant**.

1.3. Designer drugs have new, different effects on the brain and **behaviour**.

1.4. Their ingredients and **potency** vary considerably.

2. Karikázza be az **egyetlen** helyes megoldás számát az elhangzott szöveg alapján.

(3 pont)

2. 1. New designer drugs have effects on ...

2.1.2. several areas including the cerebro- and cardiovascular systems.

2.1.2. the cardiovascular system only.

2.1.3. the brain and blood vessels only.

2. 2. A large dose taken may impact on ...

2.2.1. psychomotor functions.

2.2.2. vital functions.

2.2.3. motor functions.

2.3. An excessive dose of designer drugs may lead to...

2.3.1. nausea and vomiting.

2.3.2. decreased body temperature and sweating.

2.3.3. contraction of blood vessels and increased heart rate.

3. Egészítse ki az alábbi táblázatot a hallott szöveg alapján a megadott minta szerint.

A jelölés módja: + igen, - nem

(3 pont)

serious side effects of designer drugs:	seizures	loss of memory	coma	nausea and vomiting	death

MEGOLDÓKULCS

2. szöveg

You are going to hear a dialogue between a gastroenterologist and a patient on a second visit.

Doctor: Good morning, Mr.Thompson.

Patient: Good morning, doctor.

Doctor: You were here in...er...March, right?

Patient: Right.

Doctor: And we found that you had an ulcer.

Patient: Yeah, gave me quite a shock.

Doctor: And how are you feeling?

Patient: Just fine.

Doctor: Okay. Good. You're not vomiting now?

Patient: No, no. It was bad before. I was throwing up all the time, but not now.

Doctor: And you've cut out the drinking?

Patient: Yes, I have. Haven't touched the stuff since...

Doctor: Do you have any trouble with your bowels?

Patient: No.

Doctor: No black-looking stool?

Patient: No.

Doctor: Good. And what medications are you taking now?

Patient: An antacid. I'm taking one in the morning.

Doctor: And what else are you taking?

Patient: That's all.

Doctor: Do you ever take aspirin or other painkillers?

Patient: Well, only occasionally, when I have a headache or something.

Doctor: All right. I think I should listen to your chest again.

Patient: Right.

Doctor: And we also want to check the blood... see if it's gotten any better.

Patient: Okay.

Doctor: Would you just lie on the couch, please. I'll just feel your stomach here. Okay, fine. Now, I just want to take your blood pressure as well and take a blood sample.

Patient: Okay.

Doctor: Okay. I'll send that samples off and we'll check it. If the sample is okay we won't need to go on seeing you any more.

Patient: So you think I'm getting better.

Doctor: Absolutely, I think it's all settling down now.

Patient: Well, thanks very much, doctor.

Doctor: You can put your shirt on, and when you're ready go straight to the reception. The nurse will check your card.

Patient: Thanks a lot. Goodbye.

Doctor: Goodbye.

FELADATLAP

2. szöveg

1. Egészítse ki az alábbi mondatokat **egyetlen.** a szövegben elhangzott angol szóval.

(4 pont)

1.1. The patient was diagnosed with **ulcer** in March.

1.2. The patient has stopped **drinking** since the previous visit.

1.3. The patient has no problems with his **bowels**.

1.4. The patient hasn't noticed black **stool**.

2. Karikázza be az **egyetlen** helyes megoldás számát az elhangzott szöveg alapján.

(3 pont)

2. 1. The patient is taking...

2.1.1. an anti-hypertensive.

2.1.2. an anti-inflammatory drug.

2.1.3. an antacid.

2. 2. The patient takes painkillers...

2.2.1. only occasionally.

2.2.2. regularly.

2.2.3. only once a year.

2.3. The doctor wants to examine the patient's...

2.3.1. chest and stomach.

2.3.2. vision and hearing.

2.3.3. urine output.

3. Döntse el, hogy az alábbi állítások közül melyik igaz és melyik hamis. A jelölés módja:

I – igaz, H – hamis.

(3 pont)

3.1. The doctor takes a blood sample from the patient. **I**

3.2. The patient will have to come back for a check-up regularly. **H**

3.3. The doctor thinks the patient's condition is improving. **I**
