1. szöveg

1. A szövegrészek tartalmát összefoglaló kifejezéseket (a-f) rendelje hozzá a megfelelő bekezdésekhez úgy, hogy a bekezdéseket jelölő számot a táblázat megfelelő helyére írja. Figyelem, 2 kifejezés nem rendelhető egyik bekezdéshez sem.

(4 pont)

a)	differential diagnosis	-
b)	disease characteristics	1
c)	impact of early diagnosis on outcomes	2
d)	prognosis	-
e)	risks of treatment	4
f)	therapeutic options	3

2. Egészítse ki az alábbi táblázatot a szöveg alapján. Válaszaiban kijelölt helyenként **egyetlen** angol szót használjon.

(6 pont)

Crohn's Disease (CD)

description of the disease	<ul style="list-style-type: none"> - CD is a severe (1) inflammatory condition affecting the GI system - CD may develop at any age, and has a significant (2) burden on active workforce
established diagnosis	<p>Often delayed due to:</p> <ul style="list-style-type: none"> - the variety of the (3) differential diagnosis - the low incidence of CD in primary care
treatment	<ul style="list-style-type: none"> - the choice of treatment and the exact (4) timing are crucial - novel options (biological therapy and immunomodulators) aim at modifying (5) immune function in slightly different ways - the beneficial effects should be (6) balanced/ weighed against the risks - they can have severe adverse effects

2. szöveg

1. Karikázza be az **egyetlen** helyes megoldás számát a szöveg alapján.

(4 pont)

1.1. Injuries

- 1.1.1. impose a greater burden worldwide than infections.
- 1.1.2. are responsible for up to 10 % of deaths worldwide.**
- 1.1.3. are responsible for 89 % of the total number of deaths.
- 1.1.4. will be the fifth leading cause of death worldwide by 2030.

1.2. The burden of injuries

- 1.2.1. is evenly distributed among less well-to-do countries.
- 1.2.2. is smaller in less well-to-do countries but is projected to rise again in these countries.
- 1.2.3. is projected to increase in all regions of the world but not to the same extent.
- 1.2.4. is expected to rise in the poorest countries to a larger extent than in other regions.**

1.3. Unintentional injuries

- 1.3.1. impose a smaller burden in Africa and the Americas than intentional injuries.
- 1.3.2. were the sixth leading cause of death in middle-income countries in 2004.
- 1.3.3. impose the greatest burden in less well-to-do countries in the Eastern Mediterranean region.
- 1.3.4. are expected to rise in number in low- income countries as a result of increasing motorization.**

1.4.

- 1.4.1. Injuries caused by the victims themselves are the second leading cause of injury-related deaths.
- 1.4.2. Death rates from violence are slightly higher in less well-to-do countries than in other regions.
- 1.4.3. Intentional injuries impose a smaller burden worldwide than accidents.**
- 1.4.4. The burden of intentional injuries is greatest in South Africa.

2. Egészítse ki az alábbi összefoglaló szöveget **egyetlen** odailő angol szóval.

(6 pont)

In 2010, death rate from injuries was higher than a combined death rate of certain (1) **infections**. Almost half a million people died in injuries related to (2) **transportation** in 2010. Mortality from road-traffic injuries in Africa (3) **approaches** global mortality from this type of injury. In the next 20 years, the prevalence of injuries is likely to rise on a (4) **global** scale. However, the individual countries are not (5) **equally** affected by this problem. People living in less well-to-do countries are becoming more and more (6) **exposed** to motorization and other risk factors.
